

River Country Products

Sleep Combo Pack

Thank you for purchasing River Country Products Sleep System Combo Pack.

CHECK YOUR EQUIPMENT

This combo pack comes with a sleeping bag, pad, and pillow. We designed this combo pack to work together. The sleeping bag is light weight, compact, and works perfectly with our sleeping pad and pillow. It has pockets and a strap on the back holding the pad place The pillow also works as a pump to inflate the pad.

If we compressed the sleeping bag for shipping please decompress by loosening the straps prior to storing.

Sleeping Bag

CARE AND USE

Before storing the bag, make sure it is completely dry, and the compression straps are loose. Do not store the sleeping bag damp, wet, or compressed.

Bag straps and pockets.

Hold sleeping pad in place.

FEATURES

- The sleeping bag features two pad pockets and a pad strap to secure the pad while sleeping.
- Weighs 2lbs 8oz.
- 40°F low temp rating, 50°F comfort rating.

Sleeping Pad / Pillow

Soft Side

Firm Side

The black material is a soft knitted material that conforms to your body when you lay on it. The green side is a traditional TPU material which is firmer and similar to most inflatable pads on the market.

CARE AND USE

The pad is easy to deflate:

1. Push the valve back far enough so the valve can be held open by the weight of the pad.
2. Fold and roll up the pad from the bottom.
3. Close the inner valve and the outer valve once the pad is rolled and air is removed.

PAD REPAIR

Included with the pad is a repair patch which can be used in the event of a leak.

To repair a leak in your sleeping pad:

1. Locate the leak. This is easily done by holding the pad under water or getting the pad wet and watching for bubbles. Mark the leak location with a permanent marker or small piece of tape.
 2. Before repairing make sure the area around the leak is clean and dry.
 3. Deflate pad, peel off the back of the patch and place the patch over the leak.
- Allow the patch to set for at least one hour before filling the pad and using again

PILLOW PUMP

If you purchased our Pillow, it also works as a pump.

1. Allow the pillow to self-inflate for about 2 minutes before using it as a pump.
2. **(Important)** Attach pillow to pad with the pillow **Valve Facing Up**.
3. Follow illustration to inflate pad. Detach pillow when finished.

1. Insert the pump mouth into the pad mouth

2. Press air into the pad by both hands and single knee

3. Loosen hands to let air into pump pillow

4. Repeat pressing until finish inflation
